Table of contents

01

Scenario

THE BIG PICTURE

An era of workforce reduction

- Layoffs are now a recurring economic stress signal
- Driven by rising capital costs and weaker demand
- Reported as scattered headlines, no unified view

WHAT THE DASHBOARD DOES

- Consolidates scattered records into one view
- Reveals layoff patterns by time, industry, geography, funding stage

TARGET AUDIENCES

- Analysts
- Researchers
- HR executives
- Business decision-makers

02

Dataset

KAGGLE LAYOFFS DATASET

The dataset provides a comprehensive picture of the workforce reduction situation at companies across the world

Metadata

- Company
- Location
- Country
- Industry

Layoff events

- Date
- Total Laid Off
- Percentage Laid Off

Funding profile

- Stage
- Funds Raised

DATA OVERVIEW

From 11/03/2020 to 15/05/2026

1 — 2915 companies

2 — 66 countries
269 cities

3 — 30 industrial region
16 stages of development

DATA PREPROCESSING

Avoiding misleading conclusions about company level severity

Handle missing values

Validate categorical consistency

Standardize column names and data types

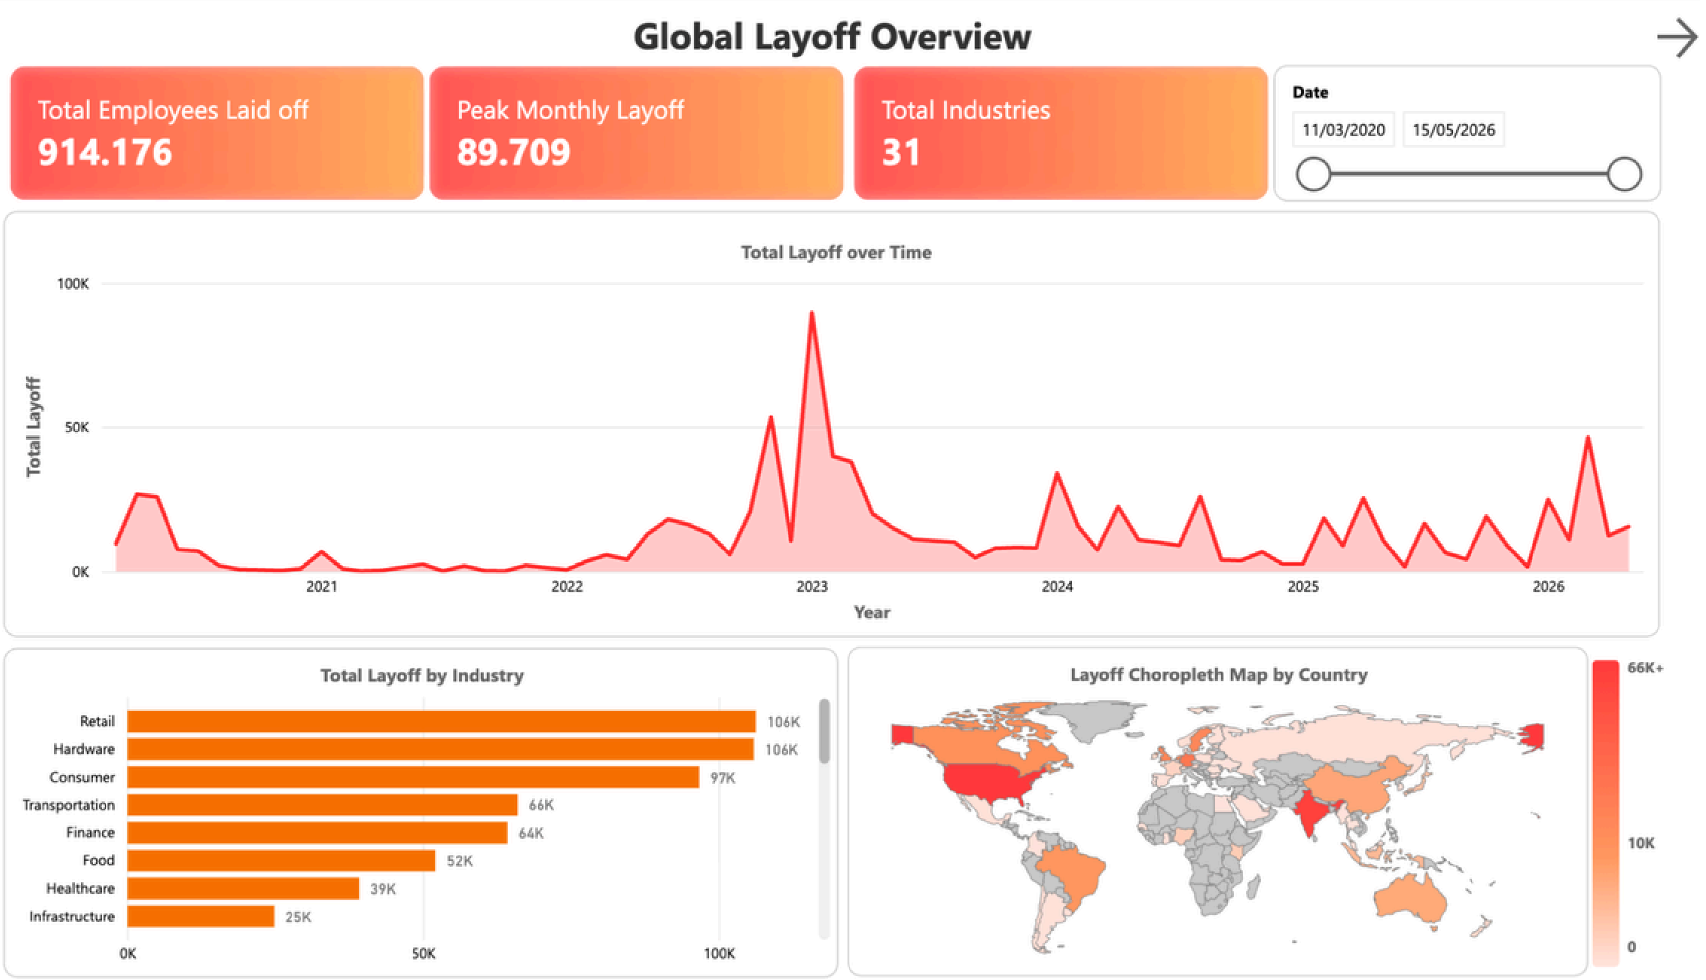
03

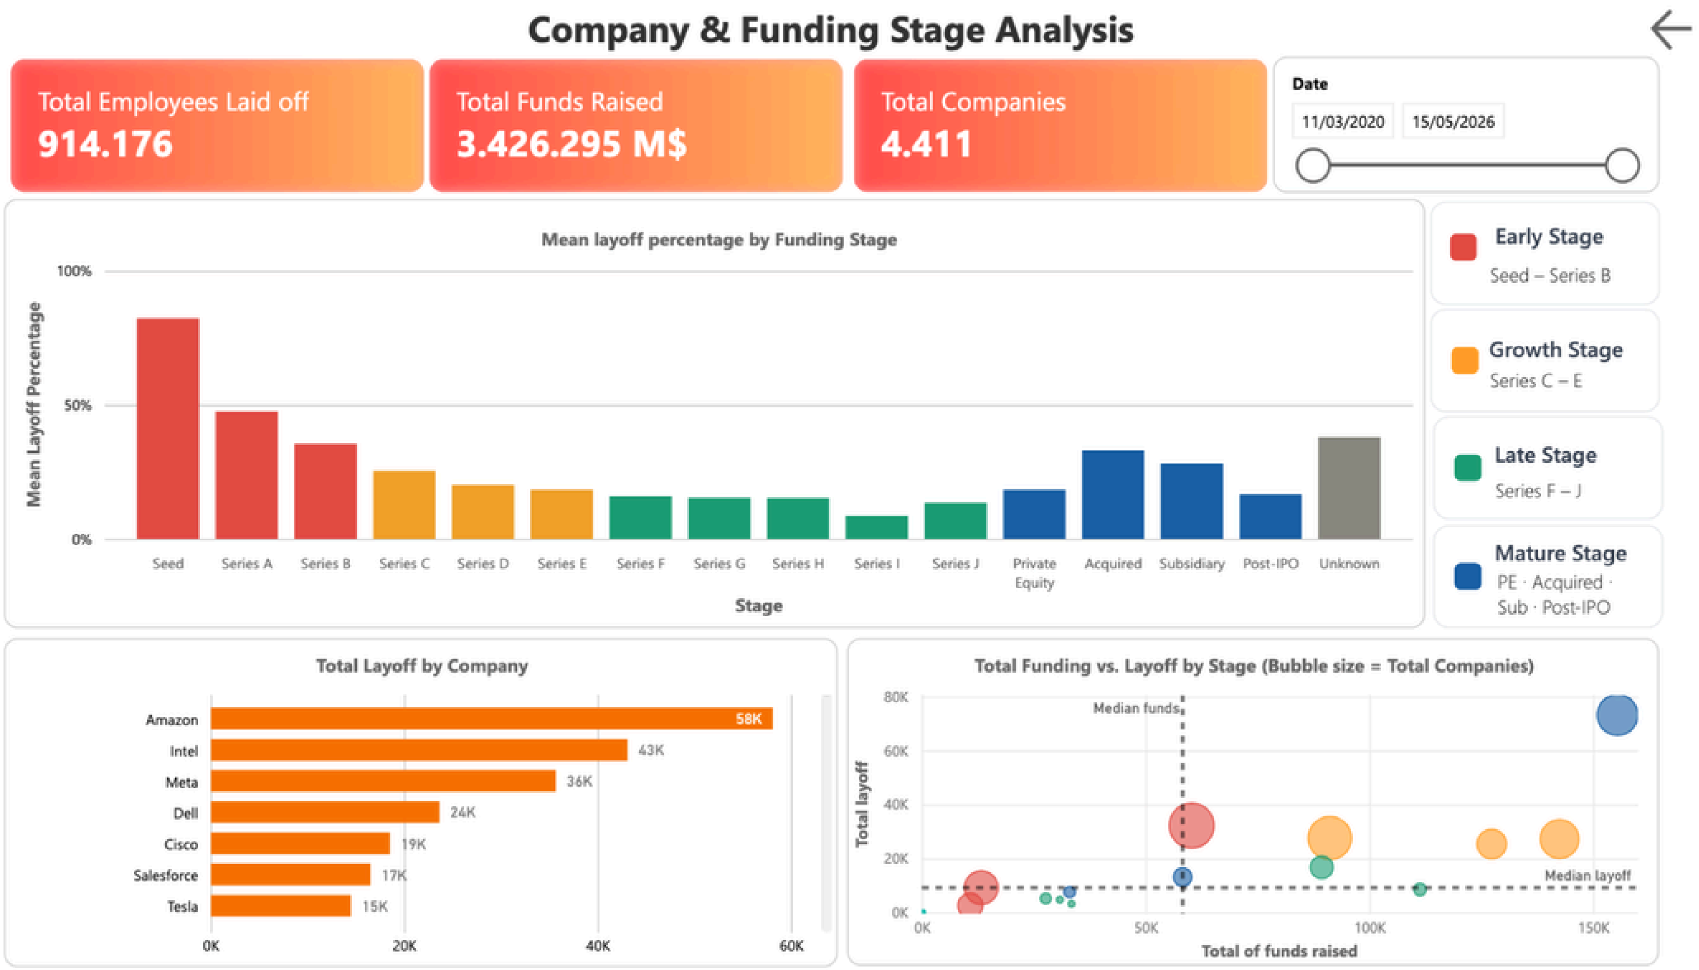
Dashboard

DASHBOARD STRUCTURE

High-level summary of global layoffs

Relationship between funding stage and layoff severity





PAGE 1

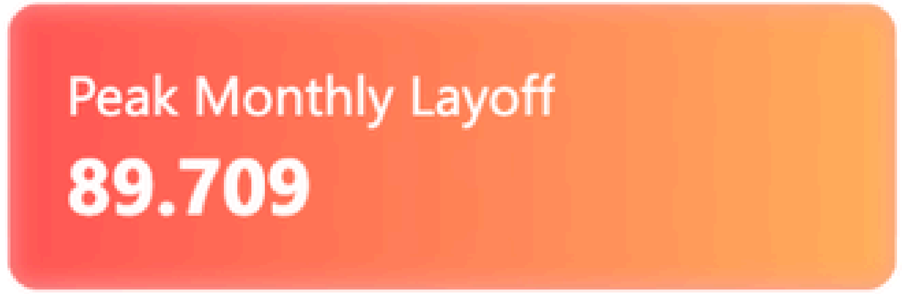
PAGE 1 - TOP SECTION

Providing information about the overall scale of the dataset

Temporal filtering for funding-stage analysis

The scale of workforce reductions across the filtered dataset

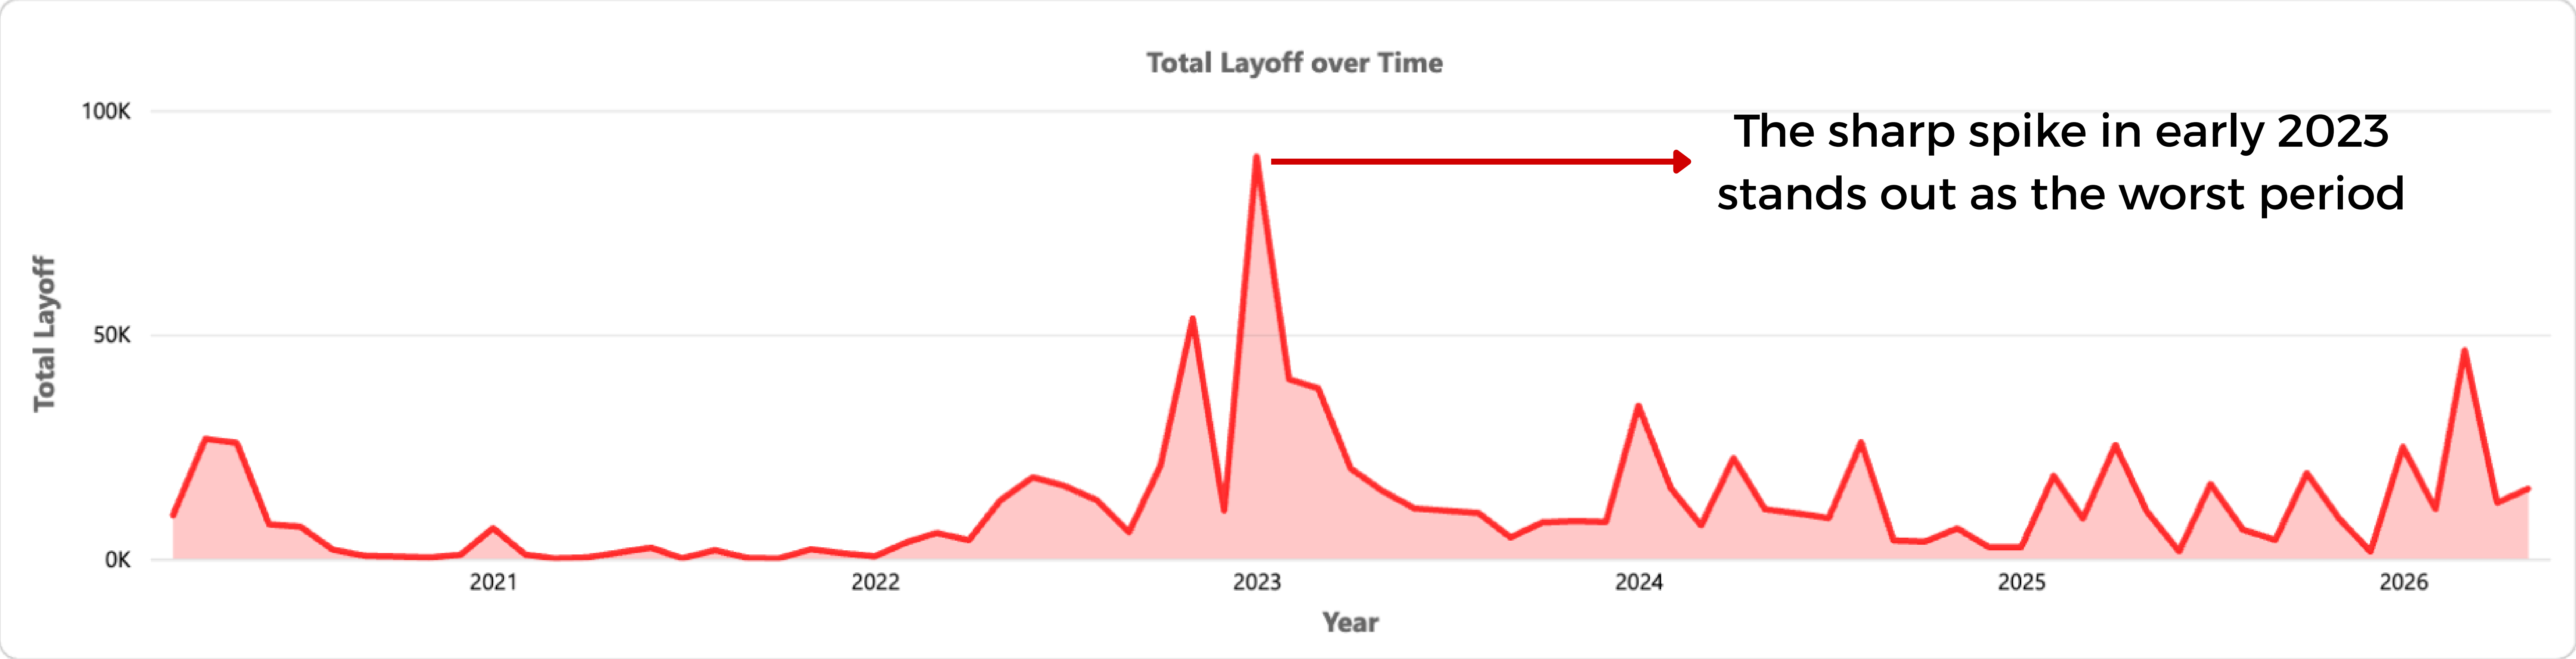


The single most severe month of job losses

The number of business sectors affected

PAGE 1 - MIDDLE SECTION

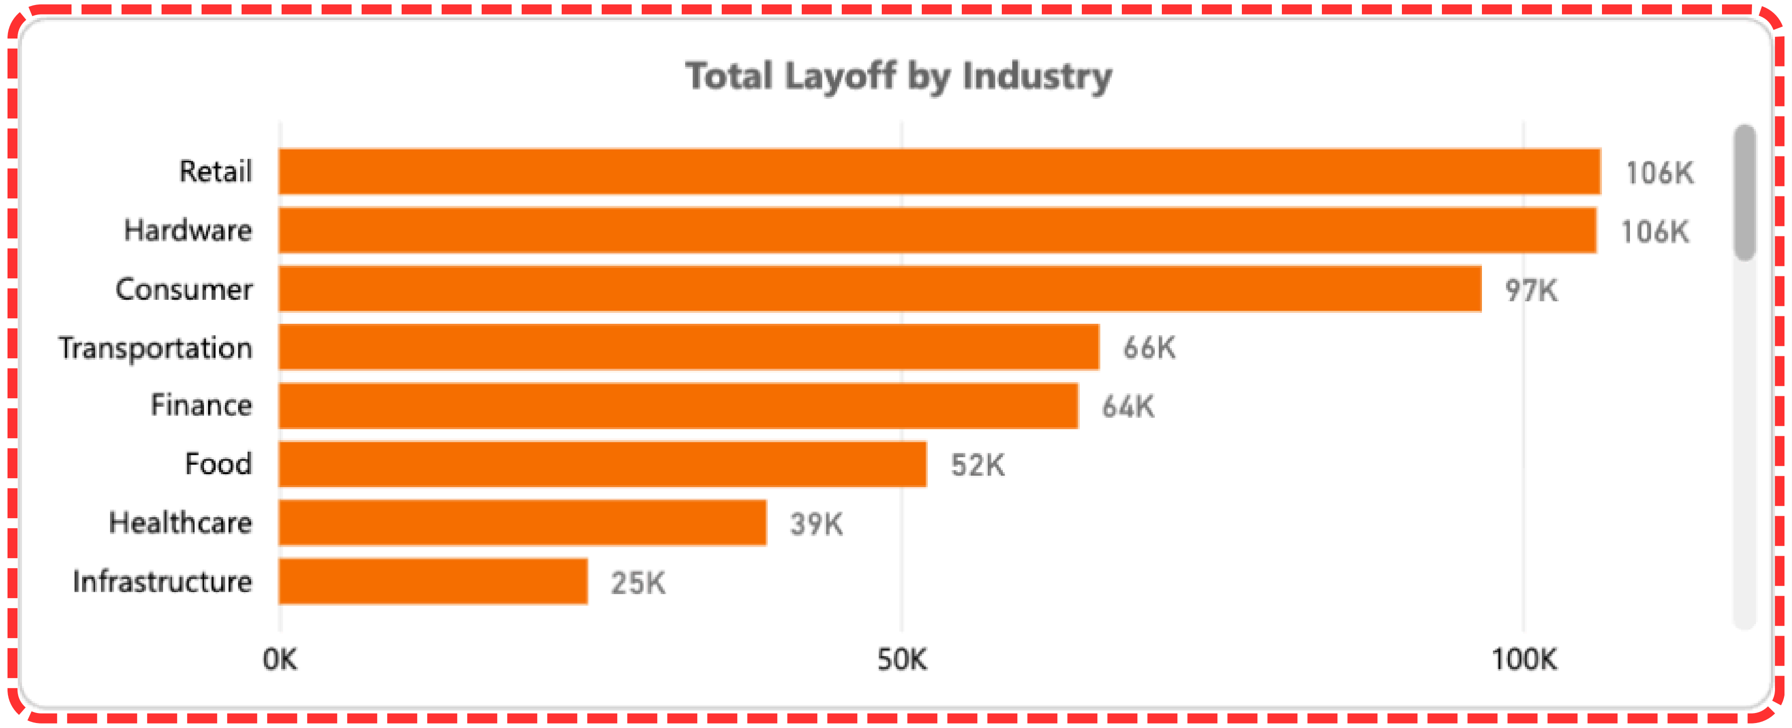
Area chart with filled region under the line emphasizes the accumulated volume of layoffs

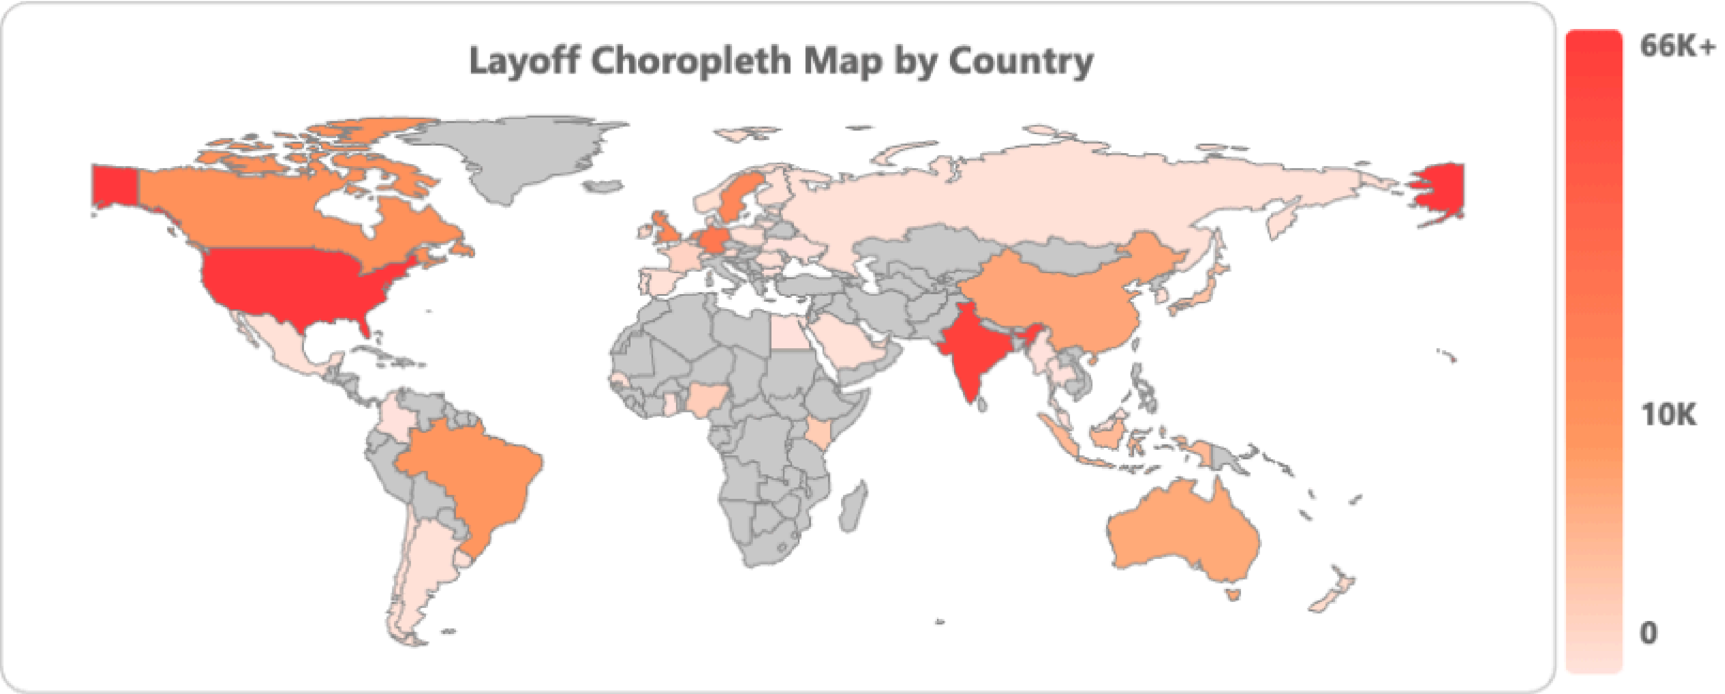


How layoffs rose and fell from any selected time range between 2020 and 2026

PAGE 1 - BOTTOM SECTION

Horizontal bar chart encodes data through length, which is an accurate channel for quantitative comparison

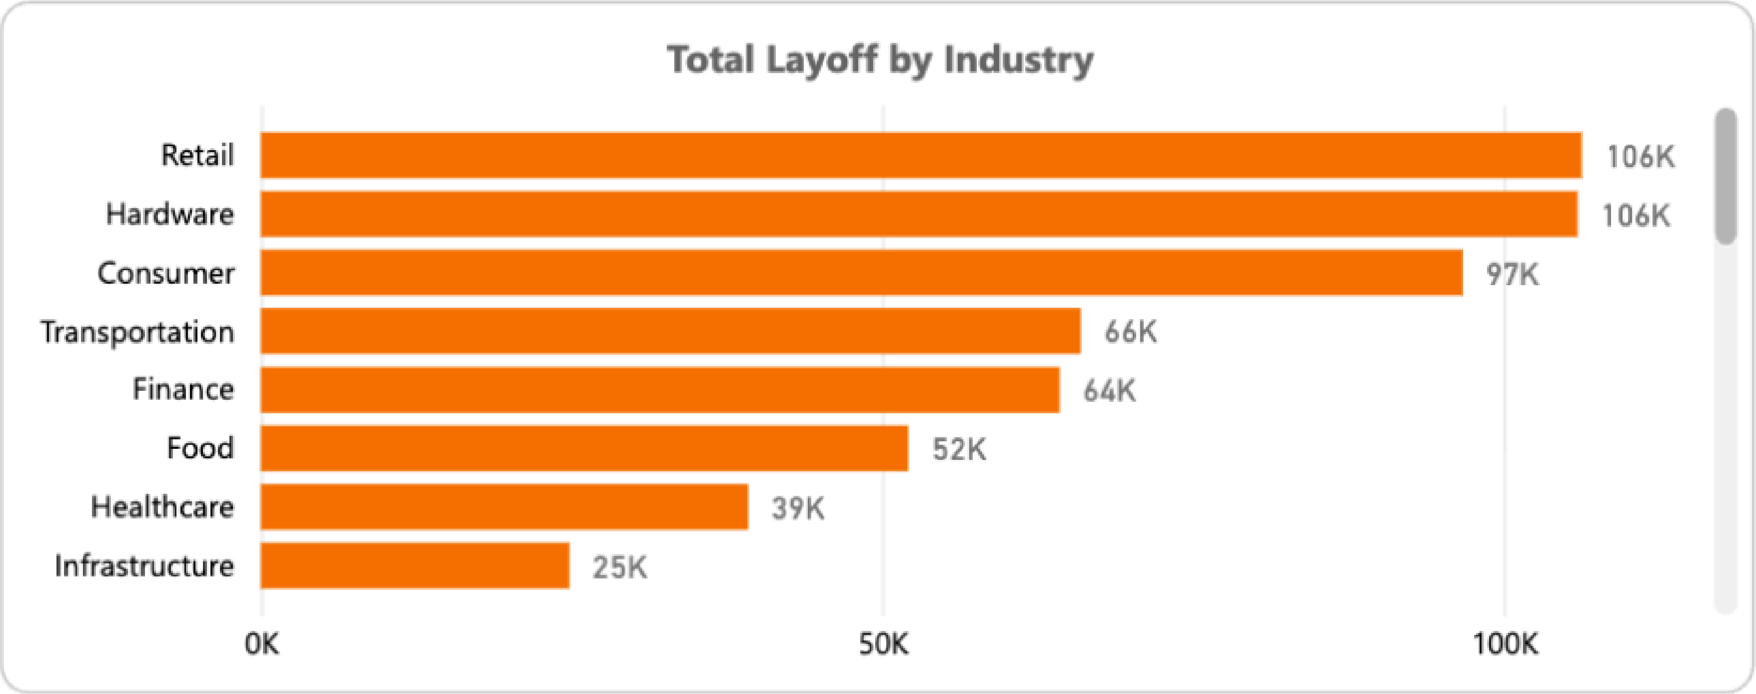


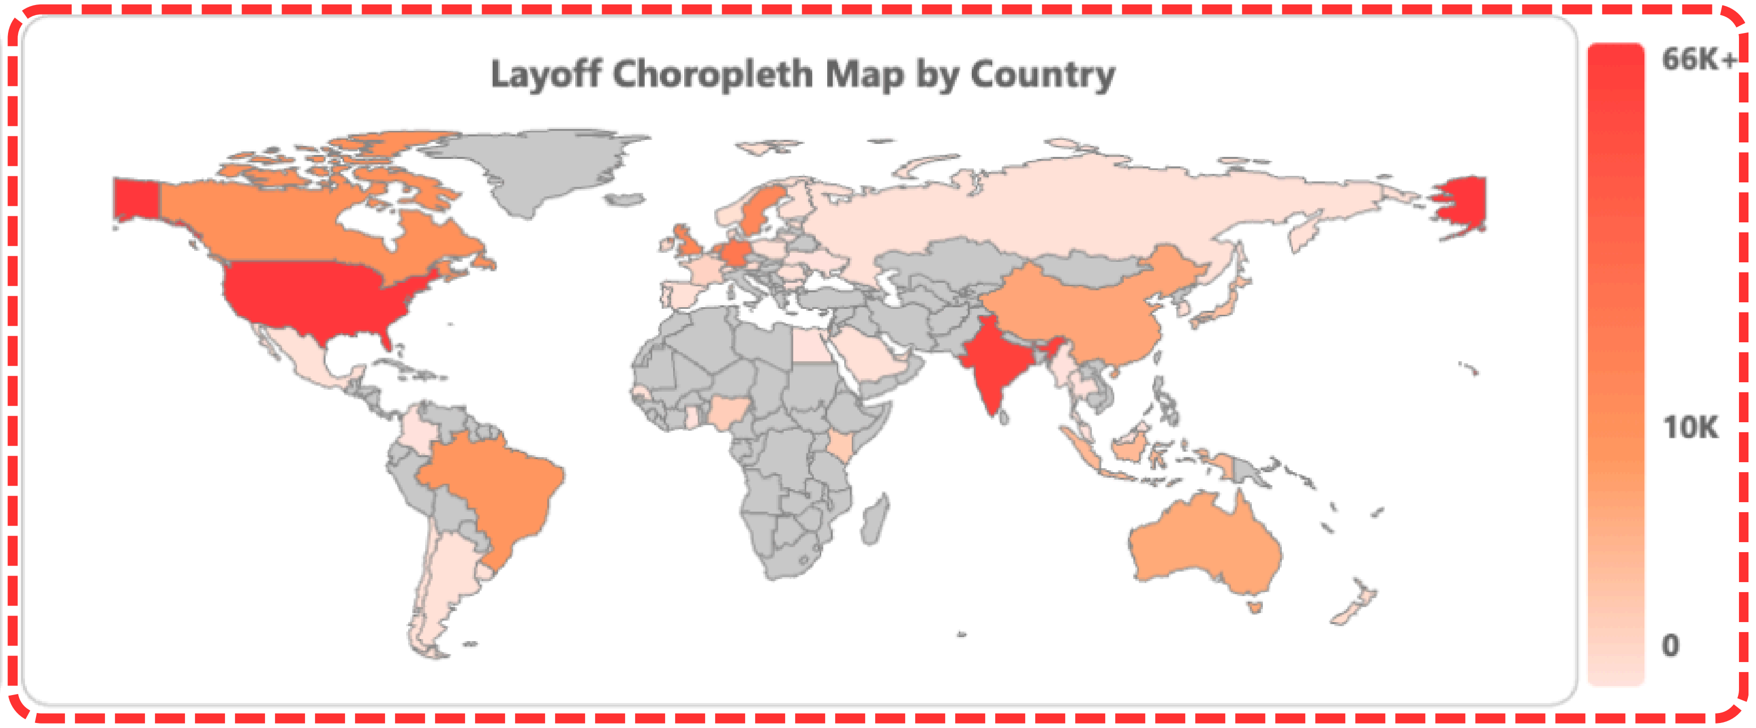


Sectors like Hardware and Retail were the most vulnerable to post-growth corrections

PAGE 1 - BOTTOM SECTION

Choropleth map uses a sequential palette to represent geographic areas based on the magnitude of layoffs





Visually, the United States and India instantly stand out as the darkest red regions, indicating they are the primary centers of these layoffs

PAGE 2

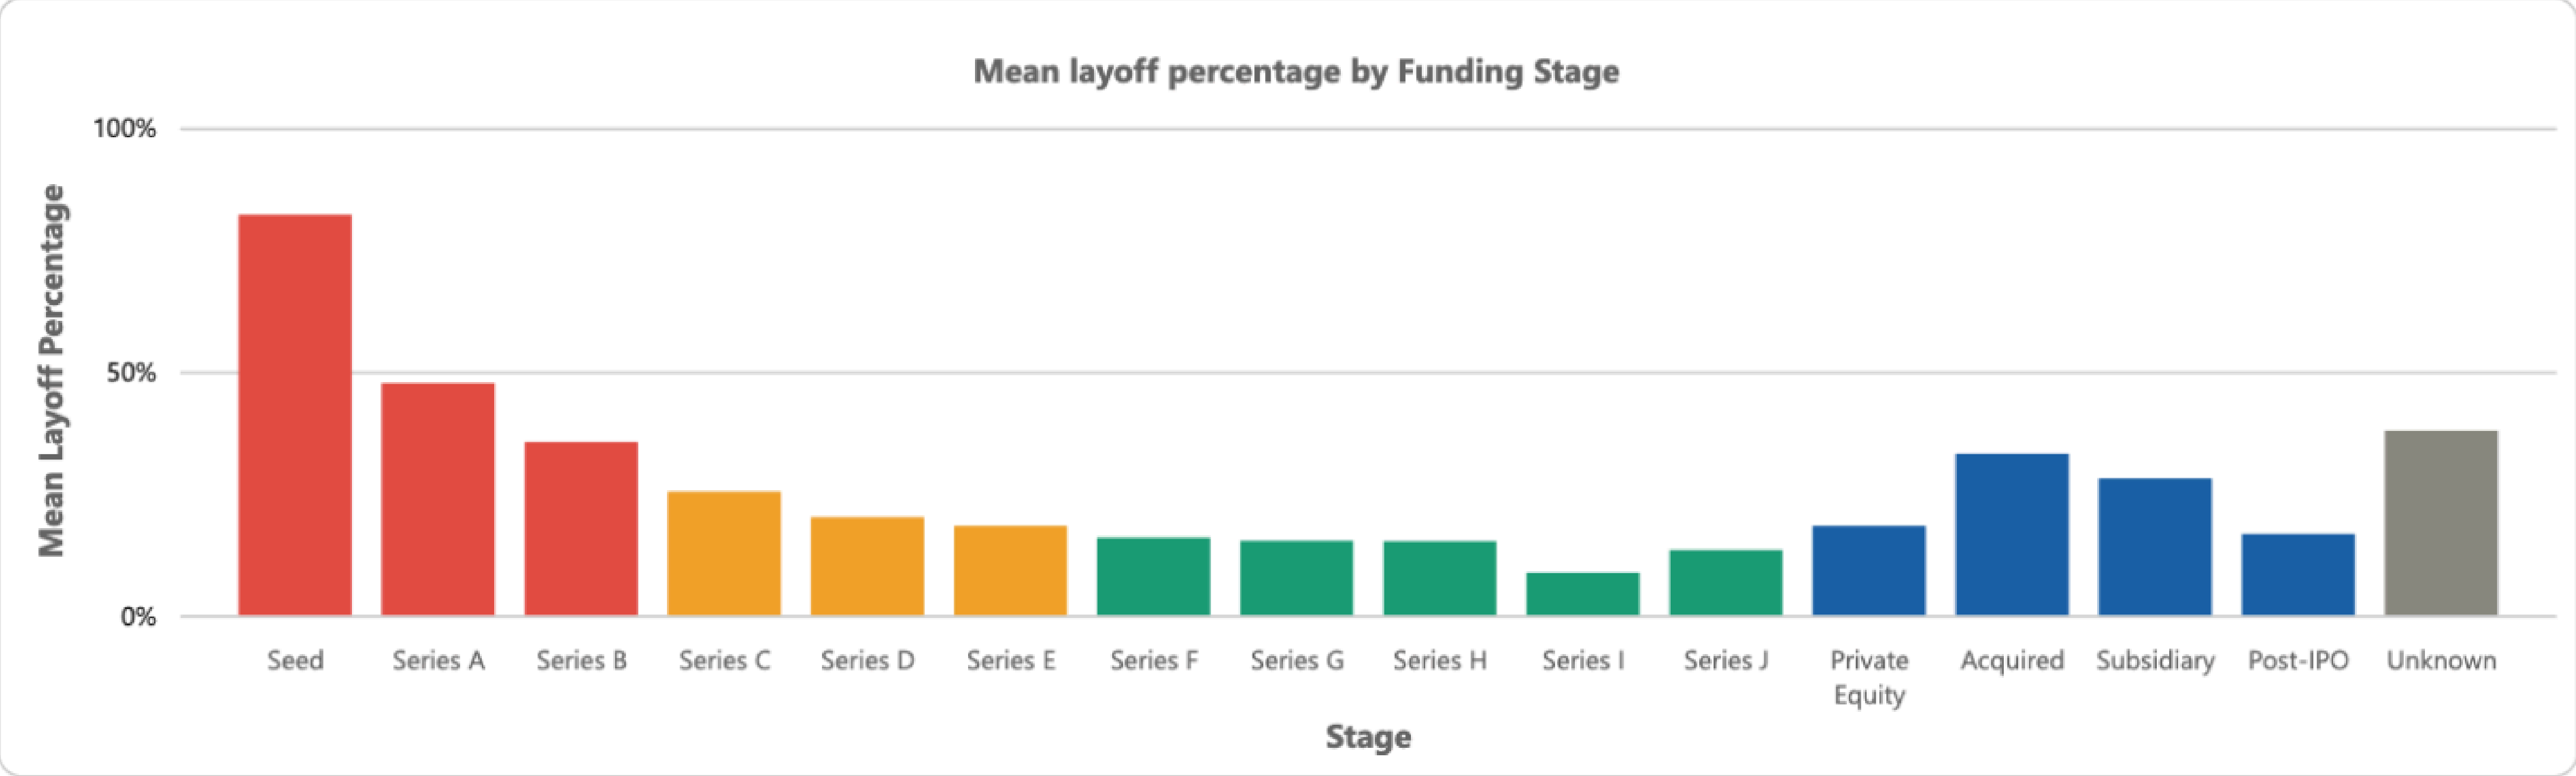
Company & Funding Stage Analysis

Total Employees Laid off
914.176

Total Funds Raised
3.426.295 M$

Total Companies
4.411

Date
11/03/2020 15/05/2026

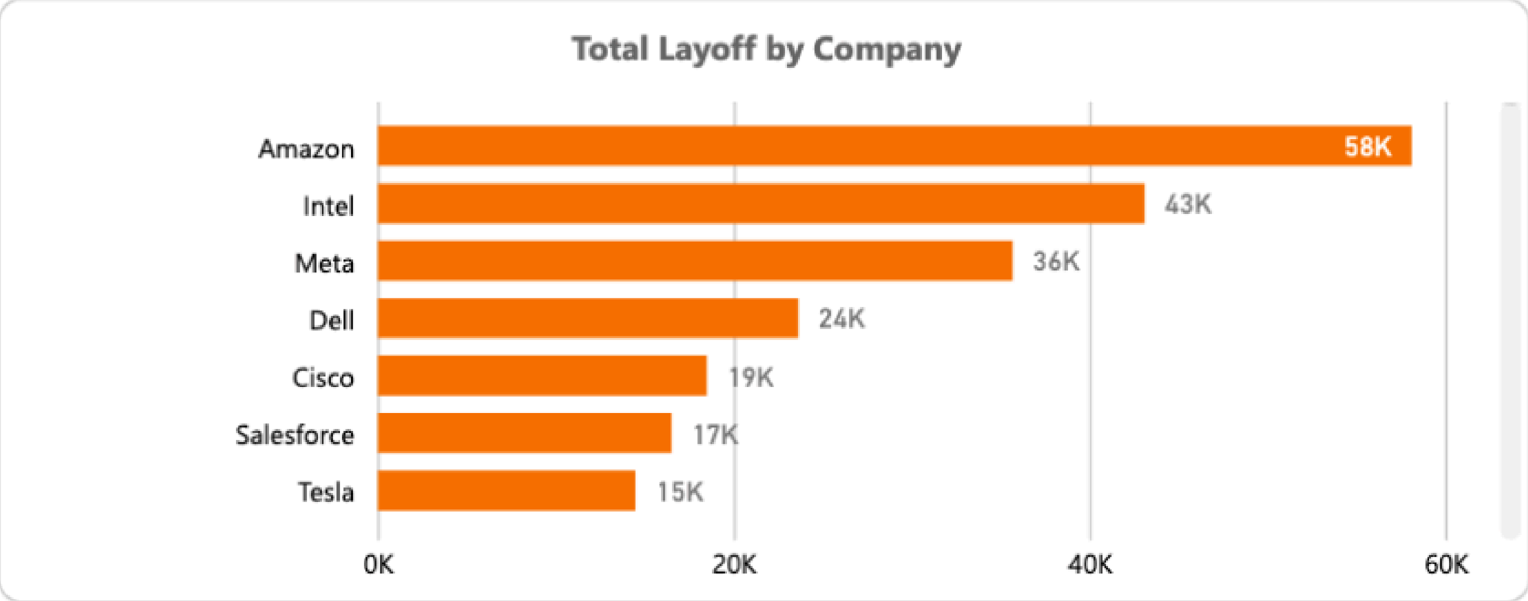


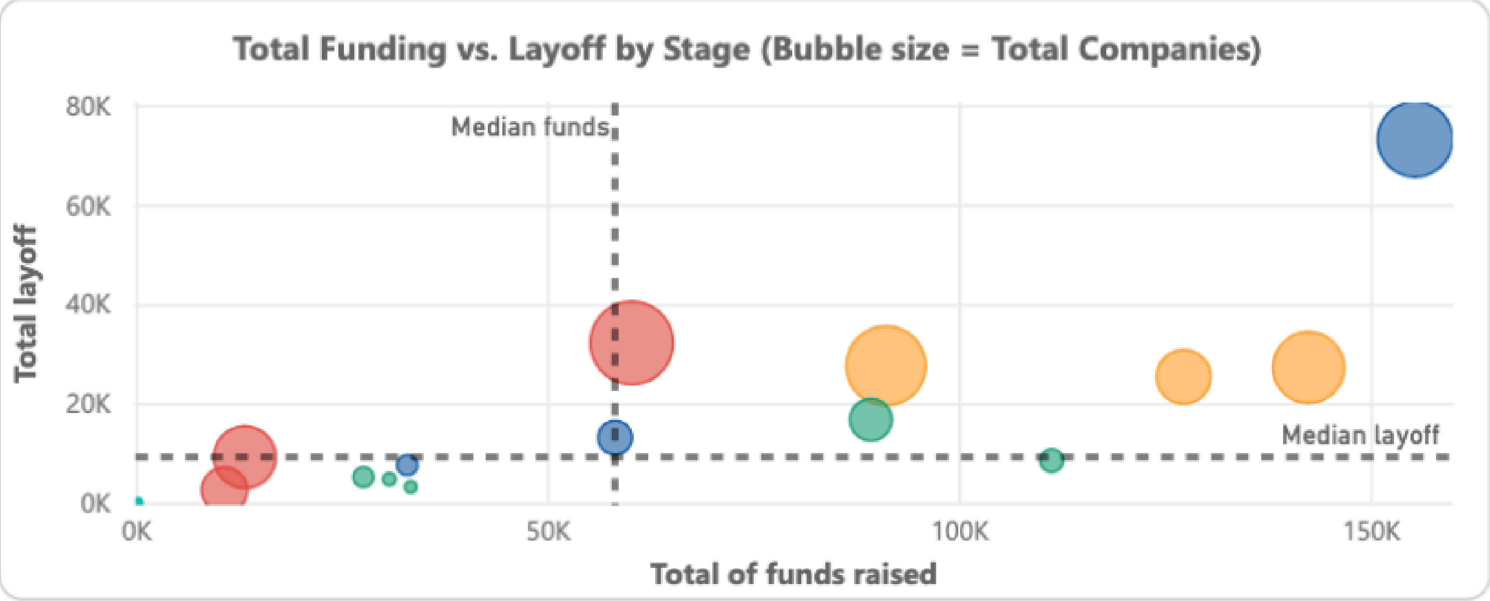
Early Stage
Seed – Series B

Growth Stage
Series C – E

Late Stage
Series F – J

Mature Stage
PE · Acquired · Sub · Post-IPO





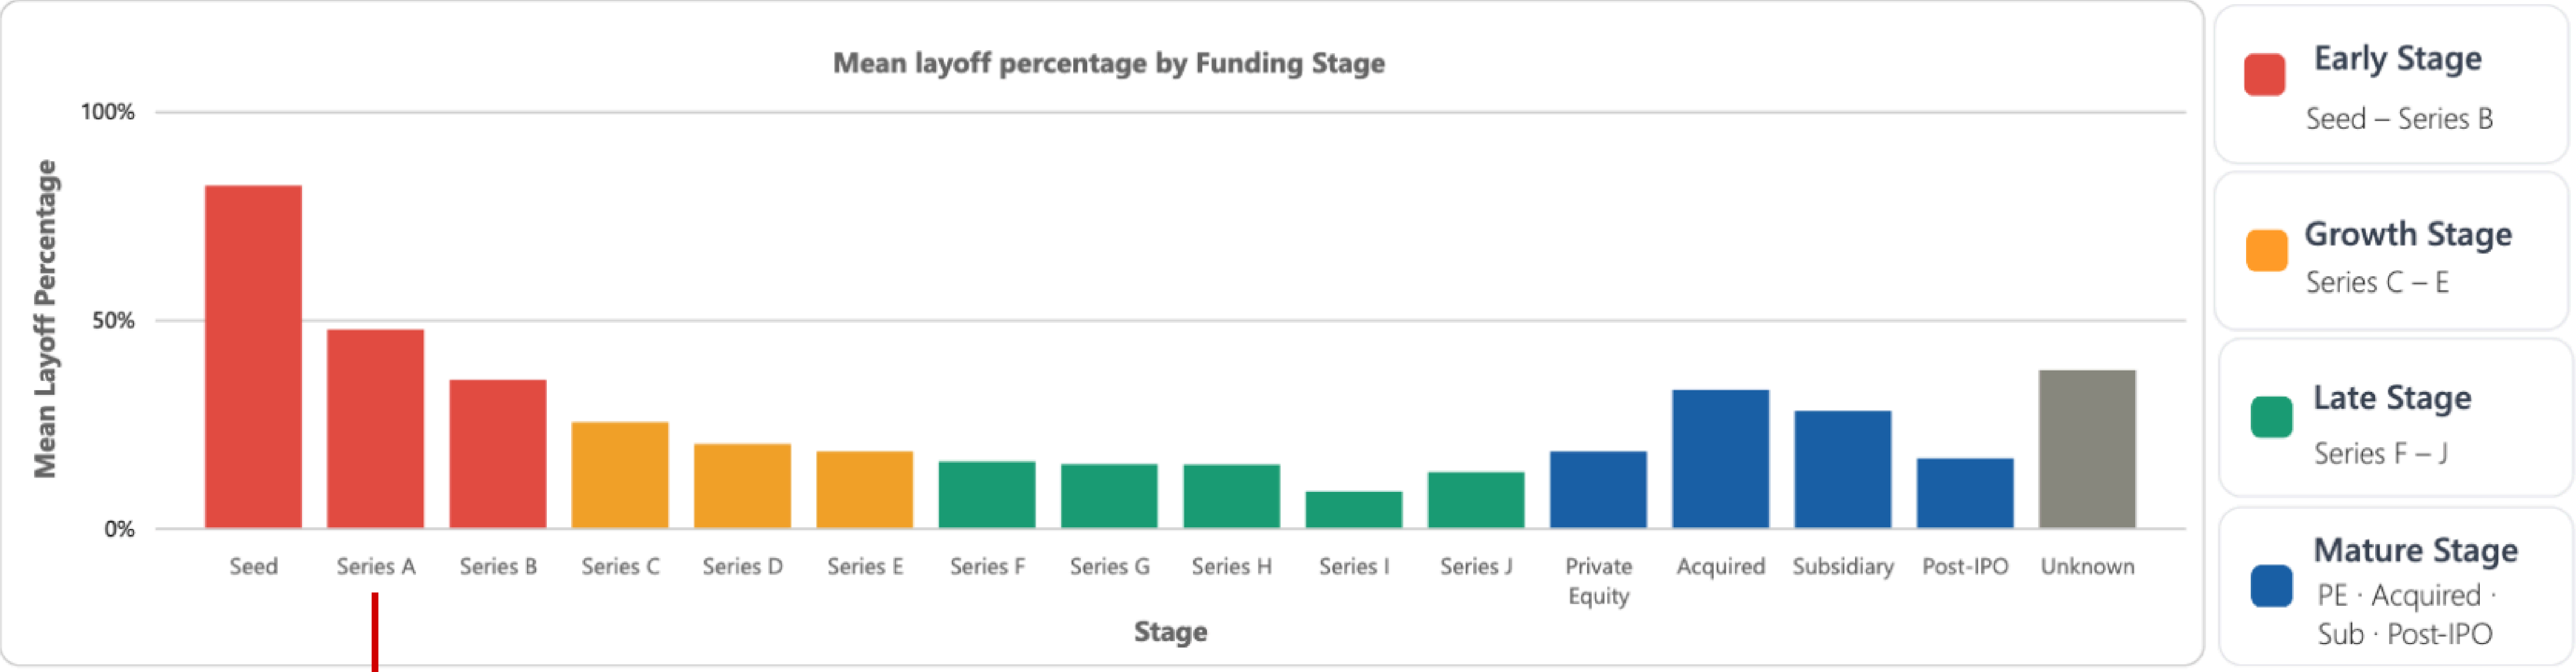
PAGE 2 - TOP SECTION

Overview of accumulated capital and total workforce reductions

Total Employees Laid off **914.176**	The total number of employees laid off
Total Funds Raised **3.426.295 M$**	The massive accumulated financial capital of all companies
Total Companies **4.411**	The number of companies with layoffs

PAGE 2 - MIDDLE SECTION

Vertical bar chart groups the funding stages into colored buckets to reduce cognitive load

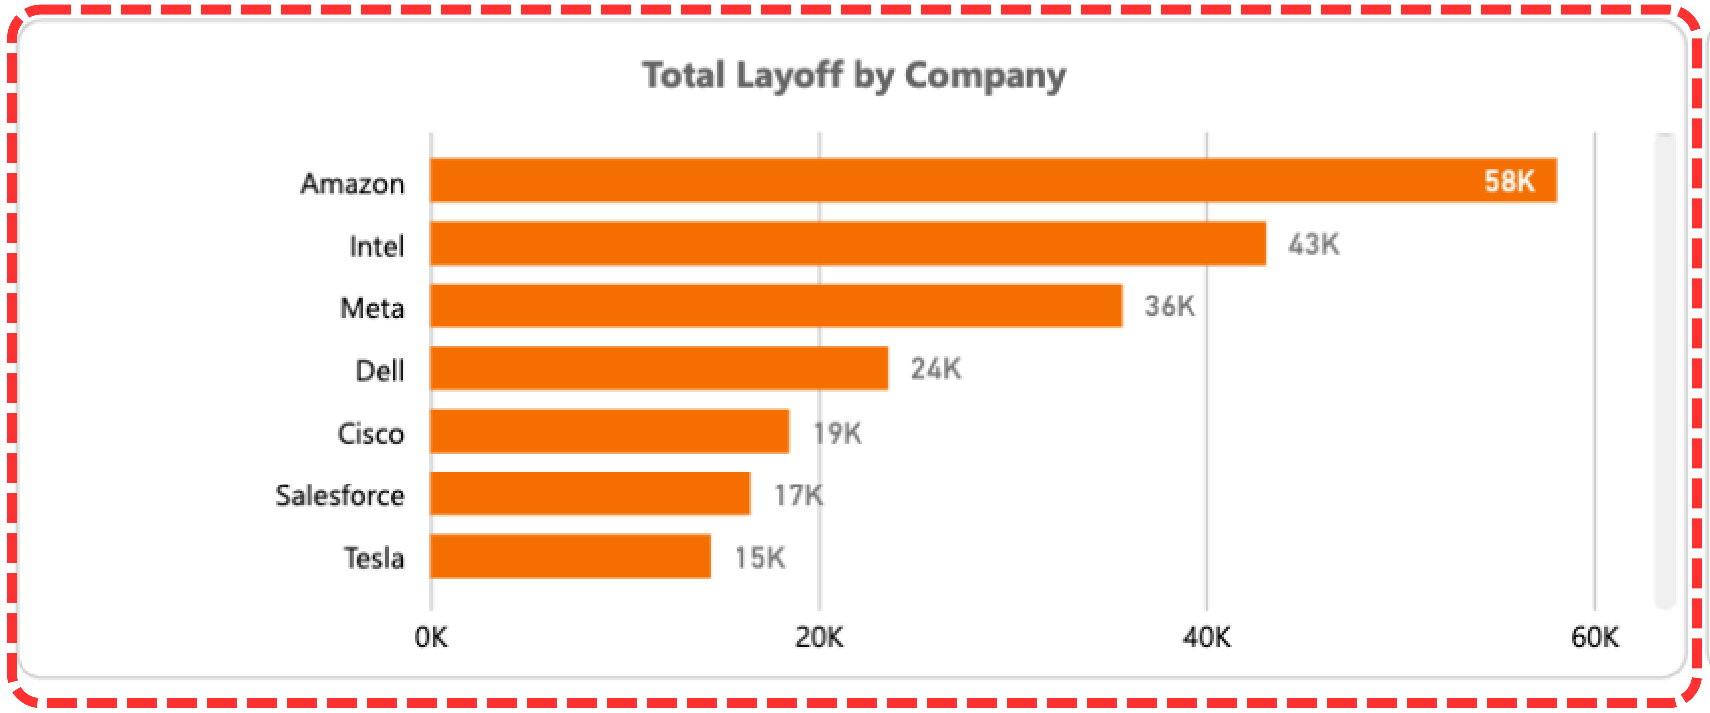


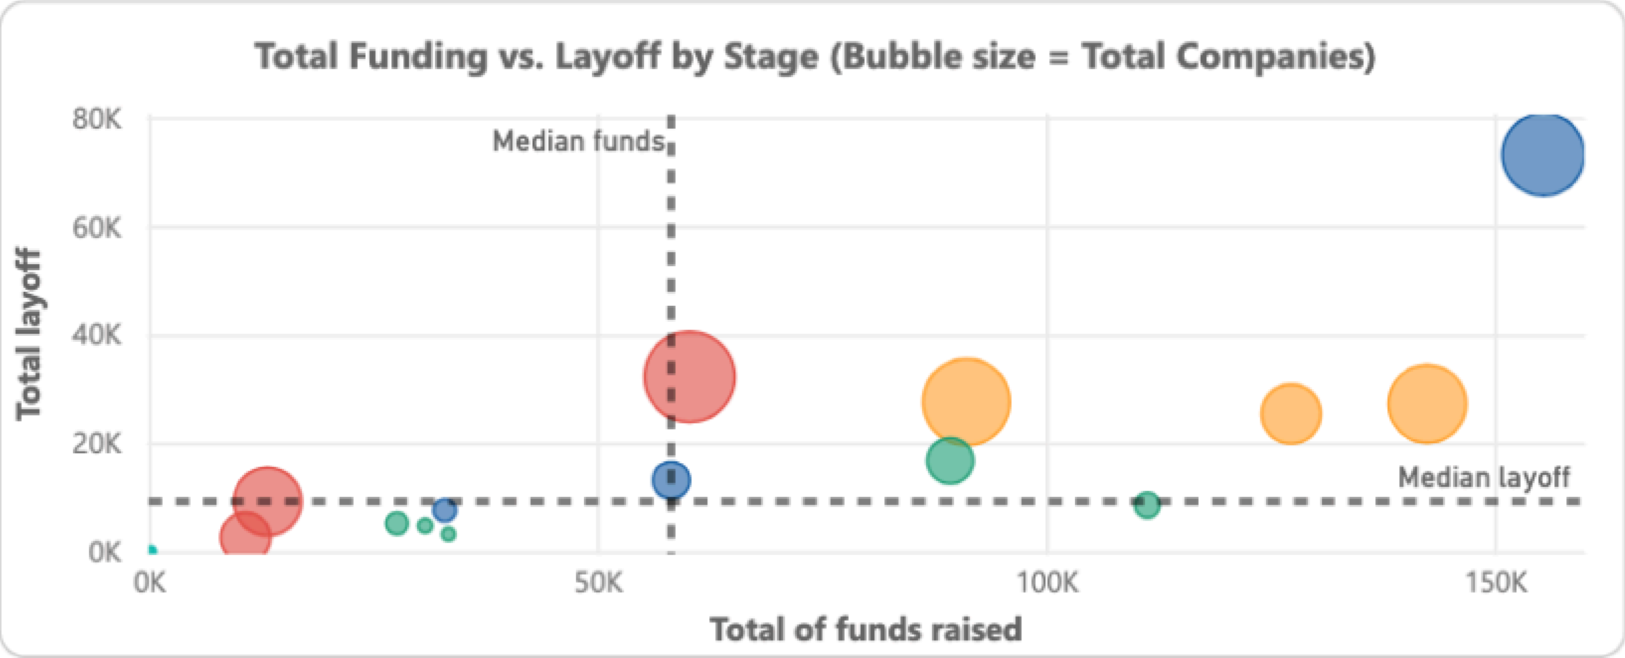
Early stages cut the biggest share of staff

Cuts ease off through later stages

PAGE 2 - BOTTOM SECTION

Horizontal bar chart compares absolute layoff scale across individual firms

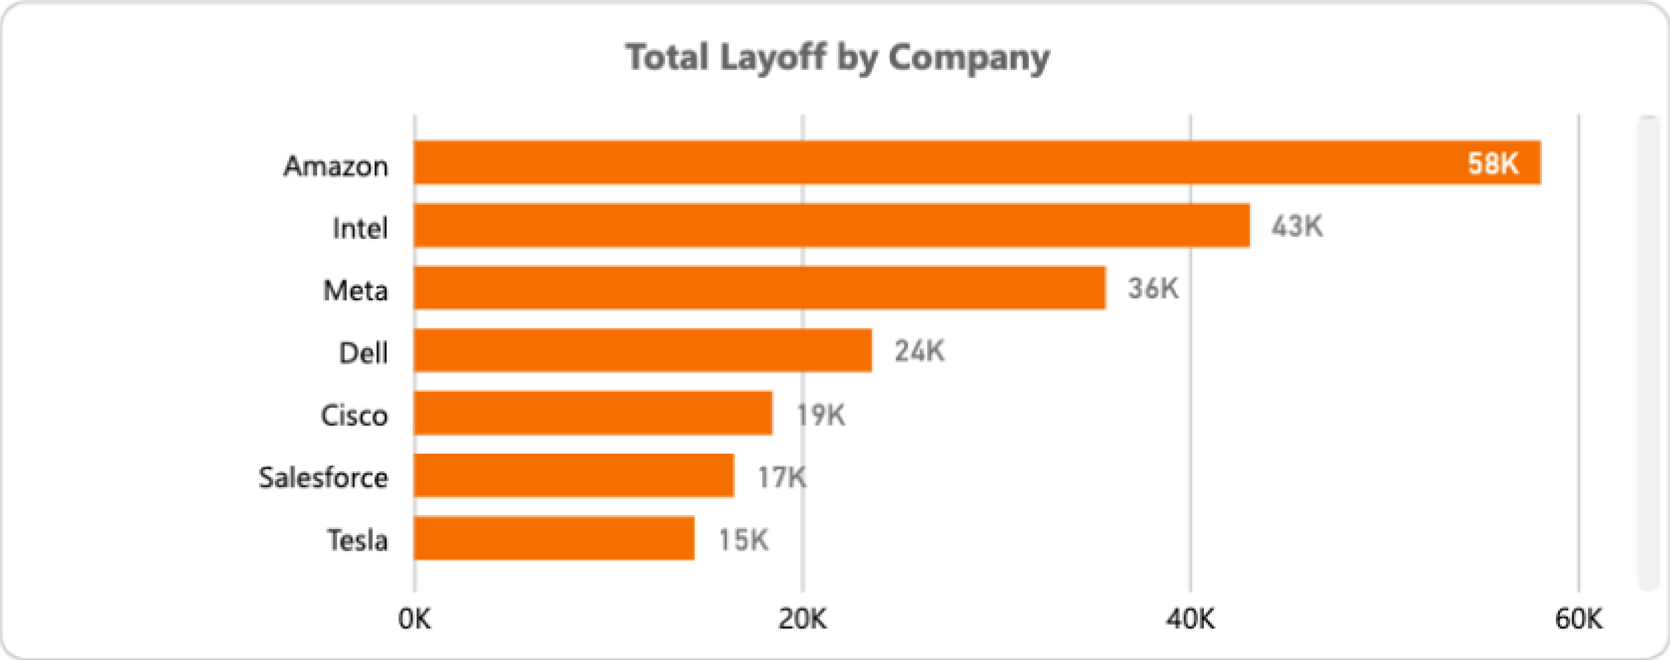


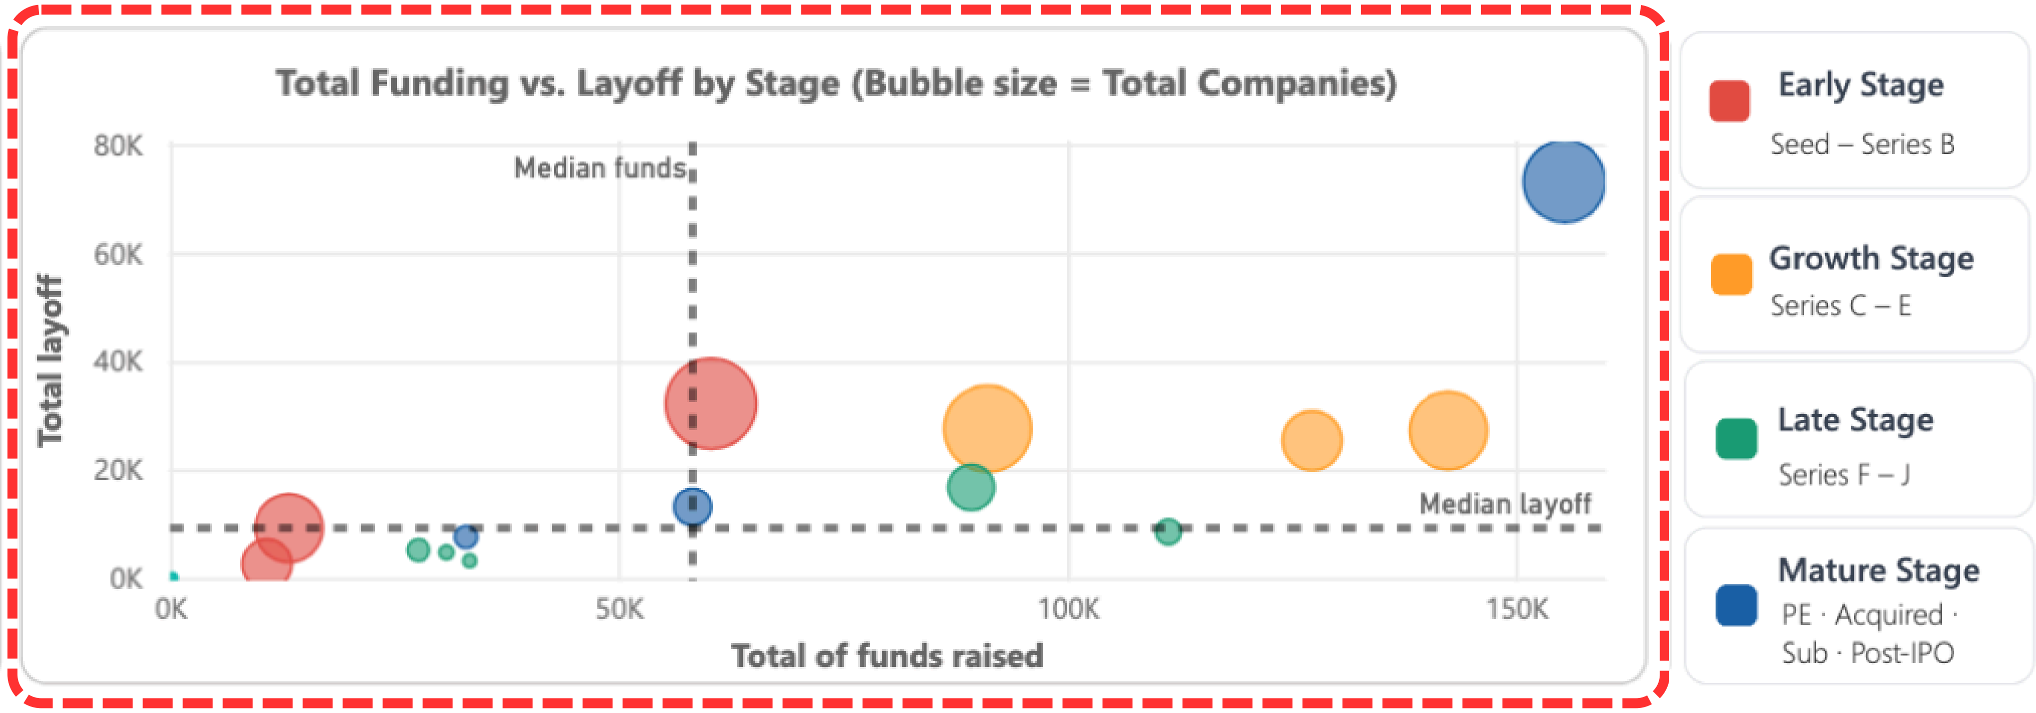


It clearly shows that Mature/Late-stage companies like Amazon, Intel, and Meta dominate the absolute counts, representing a massive external labor-market impact

PAGE 2 - BOTTOM SECTION

Scatter plot maps accumulated funding against absolute layoff size with bubble size encodes the total number of companies





High accumulated funding does not protect a firm from layoffs, heavily funded companies still executed some of the largest workforce reductions

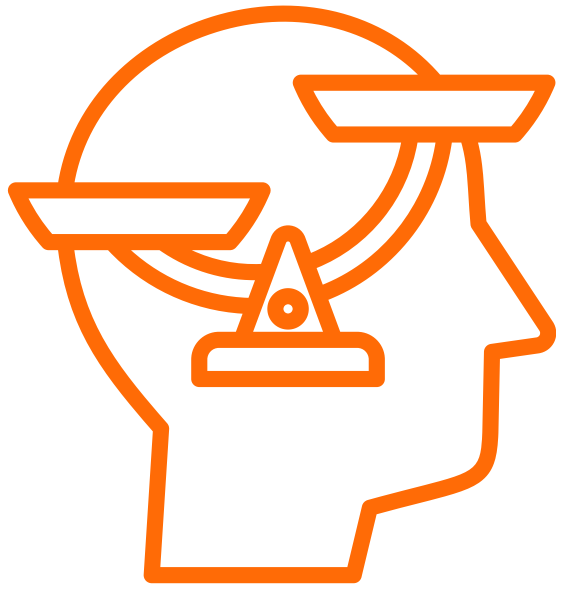
04

Conclusion

LIMITATIONS

Public Data Bias

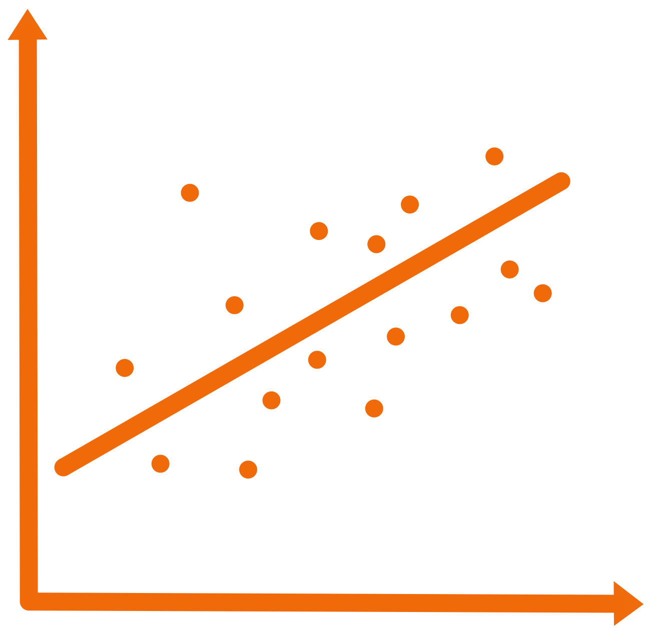


Dataset does not cover the entire labor market

Company Size Skew

Giant firms can dominate the absolute layoff counts

Correlation vs. Causation



Funding stage should not be interpreted as the direct cause of layoffs

CONCLUSION

Brings thousands of scattered layoff records into one clear view.

Balances the big picture with company and stage level detail.

Interactive filters let users explore meticulously on their own.

Helps analysts, researchers, HR, and job seekers spot where layoffs hit hardest.
